

There is no safe way to make a delivery to a non-compliant or unsafe tank. It puts both our drivers and you as the customer at risk.

### Some Key Points For a Safe Over Head Tank

- Compliant ladder with handrails, secured to a solid footing and tank
- Or fitted with a bottom fill kit. This eliminates the need to have a ladder and removes the need to climb to dip and fill
- Product ID sticker with safe fill level clearly displayed
- Solid footings / No bent legs on stand
- Clear of debris
- Clear access to tank

### Does your tank have any of the following?

- Compliant ladder?
- Bottom fill kit?
- Product type identification label with safe fill figure displayed?
- Solid footings?
- Clear of debris on & around the ground?
- Clear of limbs & power lines for truck access?
- No leaks in tank?
- No damaged or bent legs on stand?

# TANK SAFETY GUIDE

INFORMATION TO ENSURE  
YOUR TANK IS SAFE AND  
COMPLIANT

## BOTTOM FILL KITS

### SIGHT TUBE

- ✓ Customer & Driver can open tap & view the level of fuel in the sight tube that mirrors the level of fuel in the tank

All done from ground level

### BOTTOM FILL KIT

- ✓ Driver attaches delivery hose to a camlock fitting and pumps in from ground level

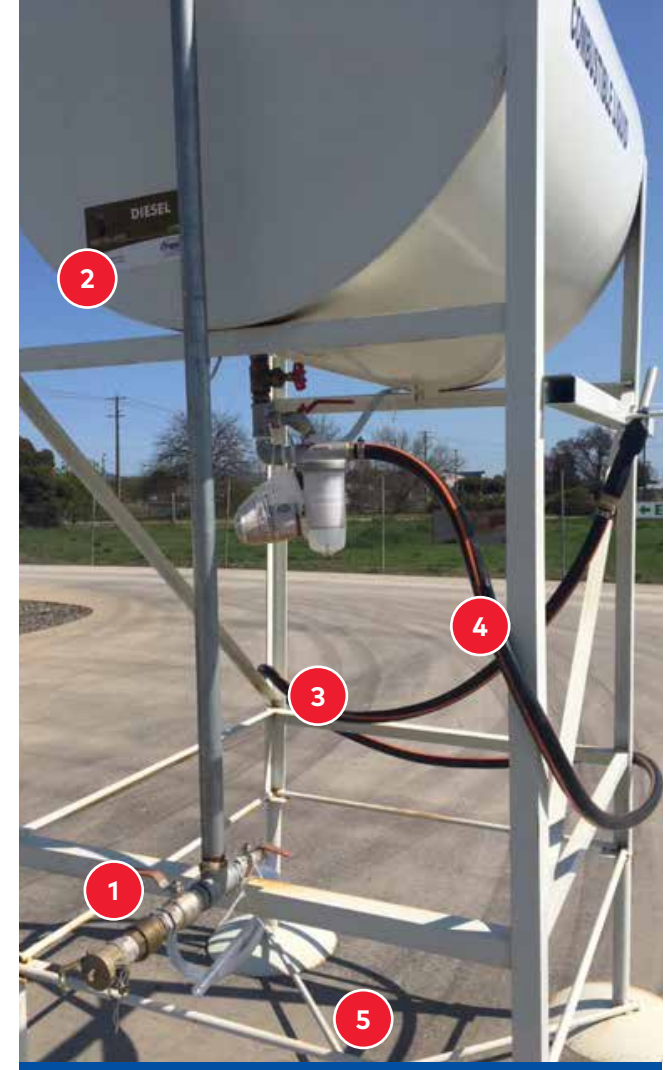

No Climbing Required

## NON-COMPLIANT

1. Non-compliant ladder, no hand rails and platform
2. No label or safe fill level
3. Stand leg has no footing and is rusted

## COMPLIANT

1. Bottom fill kit fitted
2. Labelled with safe fill level
3. Hose off the ground
4. No damage to the legs
5. Solid base ready to attach to solid footings
